

Artificial Intelligence Developer Internship

Trooclick France is a company that specializes in the development of web applications for the automatic processing of information. Our goal is to create services that rebuild the user's trust in digital content. Up to now, Web players were able to enhance the relevance of this content; we go a step further and contribute to improve its reliability with automated fact checking and controversy detection.

Trooclick was created in November 2012. Just a few months later, in April 2013, it received financial support from the BPI (French public investment bank) and in June 2013 was granted the Status of "Young Innovative Company" (JEI), recognizing its innovative nature by the French government. It now counts fifteen committed and passionate members in its tight-knit team.

The company carries out R&D projects in search of technical solutions in the Artificial Intelligence field. Due to its growth, Trooclick is now looking for candidates for its office in the "Espace Startup" of Bpifrance on Boulevard Haussmann in the heart of Paris.

Missions:

As a member of the technical team, you will benefit from ongoing training and will help us design and build our product, developing new features and working on our backend platform.

- You will turn ideas into fast, well-documented and reliable code to ensure efficiency, quality, performance and scalability
- A great team player, you will interact with other departments to understand and fine tune specifications
- You will evolve in a DevOps culture
- You will carry out unitary testing and participate in editing technical documents

Qualifications:

- BSc/MSc
- Java programming experience on Linux platforms (ORM & Spring Framework will be a plus)
- Knowledge with multiple database management systems (SQL, NoSQL, triplestores)
- Knowledge of Natural Language Processing (Information Extraction field) and Semantic Web technologies (RDF, OWL, SKOS, SPARQL, etc.)
- Knowledge of Machine Learning techniques (with tools such as Weka, Mahout, Mallet, etc.)
- Experience with RESTful web services development
- Excellent communication skills in English and French

We are open to new ideas that will significantly contribute to our success. Our friendly team will provide the opportunity for valuable collaboration.

We offer you career perspectives in a young and dynamic company with an interesting and diversified scope of duties at the cutting edge of research. We welcome applications from highly motivated individuals able to learn new techniques and share knowledge and experience with the team.
